Security / Data Rooms

A complete range of sound proofed
rooms for security and privacy

iac acoustics

making the world a quieter place

Security / Data Rooms

A complete range of acoustically certified, high performance rooms and facilities for carrying out research, interviews and other private work.

- Guaranteed, proven, sound reduction
- RF shielding available where required
- Rugged, abuse-resistant, long-lasting steel construction
- Multiple finishes available to both interior and exterior of facilities
- Completely demountable should the need for relocation arise
- Standard services include interior power, light and air conditioning

Room Construction

Completely modular, requiring no 'wet trades', facilities can be designed for both internal and external use and manufactured to a range of standard sizes or custom-built to suit individual requirements.
